Material

A board showing an imaginary African landscape divided into 253 hexagonal spaces. It is constructed from six triangular "pie-slices".

48 animals: 12 each of antelopes, baboons, giraffes and warthogs.
3 predators: crocodile (green), lion (tawny), big game hunter (white).
1 twelve-sided die.

2015 developed und previously unreleased !

Exclusively at SMART COOKIE GAMES !

A hazardous Safari in the african wildlife

The players try to pull together all their animals as a group. At least one animal of the group must stand at the end directly at the waterhole. All related animals must be on adjacent fields in any order. But beware: A crocodile, a lion and a hunters are on the prowl. And even the game reserve has its pitfalls. You can't advance with the animals, who flock from everywhere, not as far as desired.
